Scytl

Electronic **Ballot Delivery**

Secure and accessible ballot delivery and return for remote voters that reduces processing errors, improves voting integrity and efficiency, voter accessibility and remote voter participation.

Scytl Electronic Ballot Delivery allows remote voters such as military and NGO workers to receive election ballots electronically and later return their marked ballots through the postal system, email or fax. Ballots can be marked on-screen via a secure marking utility that prevents common errors such as over-voting and under-voting. Voters also have the option to print their ballots and mark them by hand.

All with the industry´s leading security and integrity protocols that ensure maximum voting privacy and election integrity.

Once ballots are completed and sent, voters can track the status of their ballots through voter receipts to ensure their vote has been received, included in the ballot box and not been tampered with.

How Electronic Ballot Delivery Works

1

Absentee Voter Request

Voters submit the required data online via a secure website. Election officials approve or reject the absentee request and validate that only one absentee vote application is submitted per voter.

2

Secure Unmarke Ballot Delivery

Secure transmission of unmarked / blank ballots electronically via encrypted channels or via postal delivery.

3

Secure Ballot Return

Voters receive, print and complete a blank ballot or directly mark their ballot on-screen and return it online, via fax or mail.

Electronic Ballot Delivery **Experience**

> *We partnered with a provider who has experience deploying a system across many and remote locations. We are challenged with connectivity and latency issues due to great distances and remoteness.*

CAROL THOMPSON,
ABSENTEE MANAGER, DIVISION OF ELECTIONS FOR THE STATE OF ALASKA.

ENABLES MILITARY AND OTHER REMOTE VOTERS TO RECEIVE AND RETURN BALLOTS ELECTRONICALLY VIA SECURE ONLINE TRANSMISSION ACROSS 7 STATES ON A STATEWIDE LEVEL AND 476 COUNTIES 2016 US PRESIDENTIAL ELECTIONS

We Power Democracy

Leading the transformation of the elections industry by making voting more accessible, efficient, transparent, auditable and secure.

+ +

Focusing on **Election Specific Needs**

We strive on understanding the needs of electoral organizations to provide efficient and transparent elections and the rights of citizens to vote on equal terms.

Providing **the Right Technology for Each Election**

Our technology provides the perfect balance between efficiency and the highest level of security and transparency standards currently available.

Delivering **Expertise and Best Practices**

Our team of electoral experts have years of accumulated knowledge and are attuned to the singular needs that each election requires.

## Addressing Election Needs Across the Election Cycle

Pre-Election
Our solutions assist election administrators with the planning, staffing, training and voter and candidate management activities necessary for the delivery of a flawless election.

Election Day
The most critical period of the election, our solutions ensure that whether in-person or remotely, voters leverage accessible technology that allow them to cast their vote privately and securely.

Post-Election
After voting, some of the most important steps take place to ensure full integrity of the votes, and the secure consolidation andpublication of election results.

Election **Day**

WE POWER **DEMOCRACY**

Pre - Election

Post - Election

About Scytl

Powering democracy in the 21st Century requires a unique combination of forces: people and technology.
